MERRY CAT
DRY FOOD CATALOG
Smart Series

MERRY SMART Cat Food is a complete and balanced dry cat food formulated to meet cats' daily nutritional needs. Every companion has different needs; proper nutrition is the common ground they all share. The Merry Orange Series brings together functional formulas developed with a scientific approach for different life stages and specific nutritional needs. Each recipe, prepared with high-quality animal proteins and carefully selected ingredients, is designed not only to meet daily nutritional requirements but also to support overall quality of life.

Low grain content, a balanced fiber profile, and carefully selected ingredients help support high digestibility and daily digestive comfort. The optimized grain content and alternative carbohydrate sources help provide a balanced starch and energy profile. By limiting the grain content and including a higher proportion of high-quality animal protein sources, the formula supports a protein-focused, balanced nutritional approach that is in line with cats' natural dietary needs.

COLOSTRUM

Nature's First Support

Colostrum, is a highly nutritious and unique milk produced by the mother during the first 48–24 hours after birth. Rich in high-quality protein, natural antibodies, vitamins, minerals, and growth factors, it helps support the immune system and contributes to healthy growth and development.

BENEFITS OF COLOSTRUM

SUPPORTS THE IMMUNE SYSTEM

Thanks to natural antibodies, it helps strengthen the immune system.

SUPPORTS GUT HEALTH

It helps maintain the intestinal flora and contributes to the regular functioning of the digestive system.

CONTRIBUTES TO HEALTHY GROWTH AND DEVELOPMENT

With growth factors and peptides, it supports cell renewal.

IMPROVES OVERALL QUALITY OF LIFE

It helps strengthen the body's defense mechanisms and increase resistance to stress.

WHAT DOES IT CONTAIN ?

ANTIBODIES

Natural protectors that support the immune system.

GROWTH FACTORS

Support cell development and tissue regeneration.

LACTOFERRIN

Supports gut health and helps maintain microbial balance.

VITAMINS & MINERALS

Essential micronutrients that complement daily nutrition.

AMINO ACIDS

Essential building blocks for muscle development and energy production.

WHY IS IT IMPORTANT ?

The natural antibodies it contains support the immune system, while growth factors and peptides contribute to cell renewal.

It supports gut health and the regular functioning of the digestive system.

Its rich content of vitamins, minerals, and amino acids helps support the body's natural defense mechanisms.

MERRY CAT & DOG

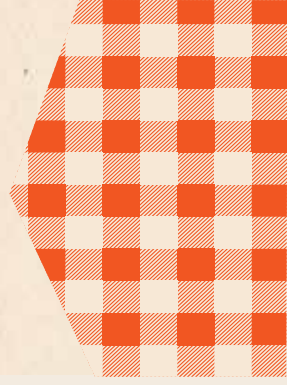

The colostrum featured in the Merry Cat & Dog series helps support the natural defense systems of kittens and puppies and contributes to a healthy start in life.

A good start is even stronger with love!

PSYLLIUM

More Than Just Fibre

CRANBERRY

Small Fruit, Powerful Bioactives

ARTICHOKE

Functional Power from Plants

PSYLLIUM is a natural source of fibre known for its soluble fibres with a high water-holding capacity. When combined with water, it forms a gel-like structure that helps balance intestinal contents. This makes psyllium a valuable functional ingredient for supporting both digestive regularity and stool quality.

WHY IS IT IMPORTANT ?

Functional Fibre

Provides valuable soluble fibre to support the digestive system.

Water-Holding Capacity

Helps maintain an appropriate consistency of intestinal contents.

Digestive Regularity

Contributes to regular and balanced intestinal function.

Stool Quality

Helps support optimal stool consistency.

CRANBERRY is a functional fruit known for its naturally occurring polyphenols, flavonoids and particularly proanthocyanidins (PACs). In addition to its antioxidant properties, cranberry and its bioactive compounds are also widely recognised in nutritional approaches designed to support urinary tract health.

WHY IS IT IMPORTANT ?

Proanthocyanidins

Among the characteristic bioactive compounds naturally found in cranberries.

Antioxidant Support

Provides natural compounds that help support cellular defence against oxidative stress.

Urinary Tract Support

Complements a functional nutritional approach designed to support urinary tract health.

Naturally Functional

Adds valuable plant-derived bioactive compounds to daily nutrition.

ARTICHOKE is more than a source of fibre. It stands out for its naturally occurring cynarin and other polyphenolic compounds. Its natural antioxidant components contribute to the support of metabolic processes while adding a valuable plant-based functional dimension to the formula.

WHY IS IT IMPORTANT ?

Natural Polyphenols

Provides a variety of plant-derived bioactive compounds, including cynarin.

Antioxidant Support

Provides nutritional compounds that help support cellular protection against oxidative stress.

Metabolic Support

Contributes to the nutritional support of normal physiological processes associated with liver function and fat metabolism.

L-CARNITIN

Putting Energy to Work

OMEGA-3

Multi-Level Support, from Skin to Coat

L-CARNITIN is a naturally occurring compound that plays a key role in transporting fatty acids into the mitochondria, where cellular energy production takes place. Through this function, it supports fat metabolism and the efficient utilization of energy. It also plays an important nutritional role in maintaining ideal body condition and supporting an active lifestyle.

WHY IS IT IMPORTANT?

Energy Metabolism

Helps transport fatty acids for use in cellular energy production.

Ideal Body Condition

Supports the maintenance of a healthy body condition as part of a balanced diet.

Active Lifestyle

Contributes to daily energy metabolism, helping support an active and vital lifestyle.

OMEGA-3 refers to a family of valuable fatty acids involved in numerous physiological functions throughout the body. Marine-derived EPA and DHA, in particular, contribute to the maintenance of healthy skin and coat quality while also supporting normal cellular functions.

WHY IS IT IMPORTANT?

Healthy Skin & Shiny Coat

Helps nourish the skin and coat and maintain their healthy appearance.

Skin Barrier

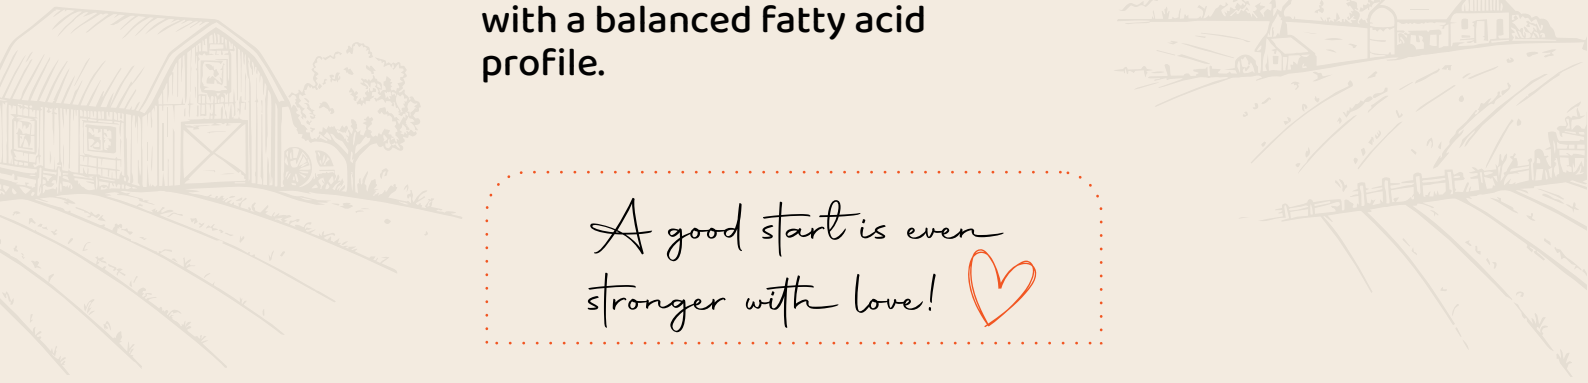

Supports the maintenance of the skin's natural barrier function.

Cellular Function

EPA and DHA are important structural components of cell membranes.

Overall Condition

Complements daily nutrition with a balanced fatty acid profile.
